## AGB453
## AG-VALUE RECAP FROM PM FILE

PROGRAM FUNCTION:
This program lists parcels from the Parcel Master that have a matching Land inventory record.

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

01   Limits
02   Parcel types and location codes
03   Select:   Residential Land
                 Commercial Land
                 Res and/or Comm Land
                 Rural Investment Land
                 (Place an 'X' next to desired option)

COMMENTS:
None

OUTPUT SUMMARY (or NA):
The report sums by category, the lots, acres, other, quantity, value, and parcel count per category, totals for each of these, the limits, and the date and time the program ran.

SPECIAL CONSIDERATIONS:
When selecting Commercial Land, the only records that will add into the totals are those inventory records that pertain to categories 13, 14, 16, 17, 21, & 22.

When selecting Residential Land, the only records that will add into the totals are those inventory records that were entered through the Residential/Commercial Data Entry on Update programs (LDO370, LDO371) that were NOT for categories 13, 14, 16, 17, 21, & 22.  When selecting Res and/or Comm. you will get all the above.

When selecting Rural Investment, only those inventory records that were entered through the Rural Investment Data Entry/Update programs (AGO450, AGO451) will add into the totals.

It is important that before the totals on this report can be considered accurate, all the edit reports should be clean (Report programs AGB455, AGB451, AGB472).

Note:  The values represented on this report are from the Parcel Master File.
