AGB455
AG-EDIT CATEGORY DUPLICATION BETWEEN RI AND RES/COMM

PROGRAM FUNCTION:

This program lists parcels that have a category in the Res/Comm Land file and in the Rural Land file.

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

01 Limits
02 Parcel types and location codes

COMMENTS:

This program is submitted to batch.

OUTPUT SUMMARY (or NA):

The report lists the parcel key, name, Residential Land value, Rural Inventory total value and quantity per category, the limits, and the warning "Residential Land & Rural Inventory both have values that may overlay each other when rolled into Parcel Master".

SPECIAL CONSIDERATIONS:

The value should NOT be in both files. If it is workable to use the Rural Inventory record cost per acre method to arrive at a value, then remove the value from the Residential Land file.

This program only edits for duplication between categories 10,11,12,15 and 18.
